Dear Maidoff Consult,

As promised during our pleasant conversation on Monday 10th October, 2022, you hereby receive my proposal for the Delivery Service partnership with your company. In this proposal I started from a nice lean & mean basis with which your various services can be lifted to a higher level. A super base that is flexible and can grow with your organization.

Sincerely,

Mr. Benjamin Acquah

About

At Enlightened Grove, we take organizations and businesses to a whole new level of success with our efficient, affordable, customized app development under your own brand.

We are a community-driven company that focuses in promoting self-sufficiency, community development, and prosperity for families by providing employment opportunities worldwide.

Why choose for us?

With our many years of experience and our in-house developed products, we are the ideal partner for companies that want to go the extra mile. We think along with you, but are occasionally a bit stubborn when necessary. By understanding the organization and activities of our customers, we can truly tailor our solutions.

We use our passion for innovation to spot opportunities for you. We think along and go for a long-term cooperation.

The proposal

We wish to partner with your company to promote safe and convenient parcel delivery across the country with our delivery service Application (Grove delivery), at a fixed fee of ghc10 per delivery. This will help promote your service delivery and as well as promote our services across your customers. With our delivery app and logistics, your customers can enjoy a reliable service in the comfort of their homes

Customer Support

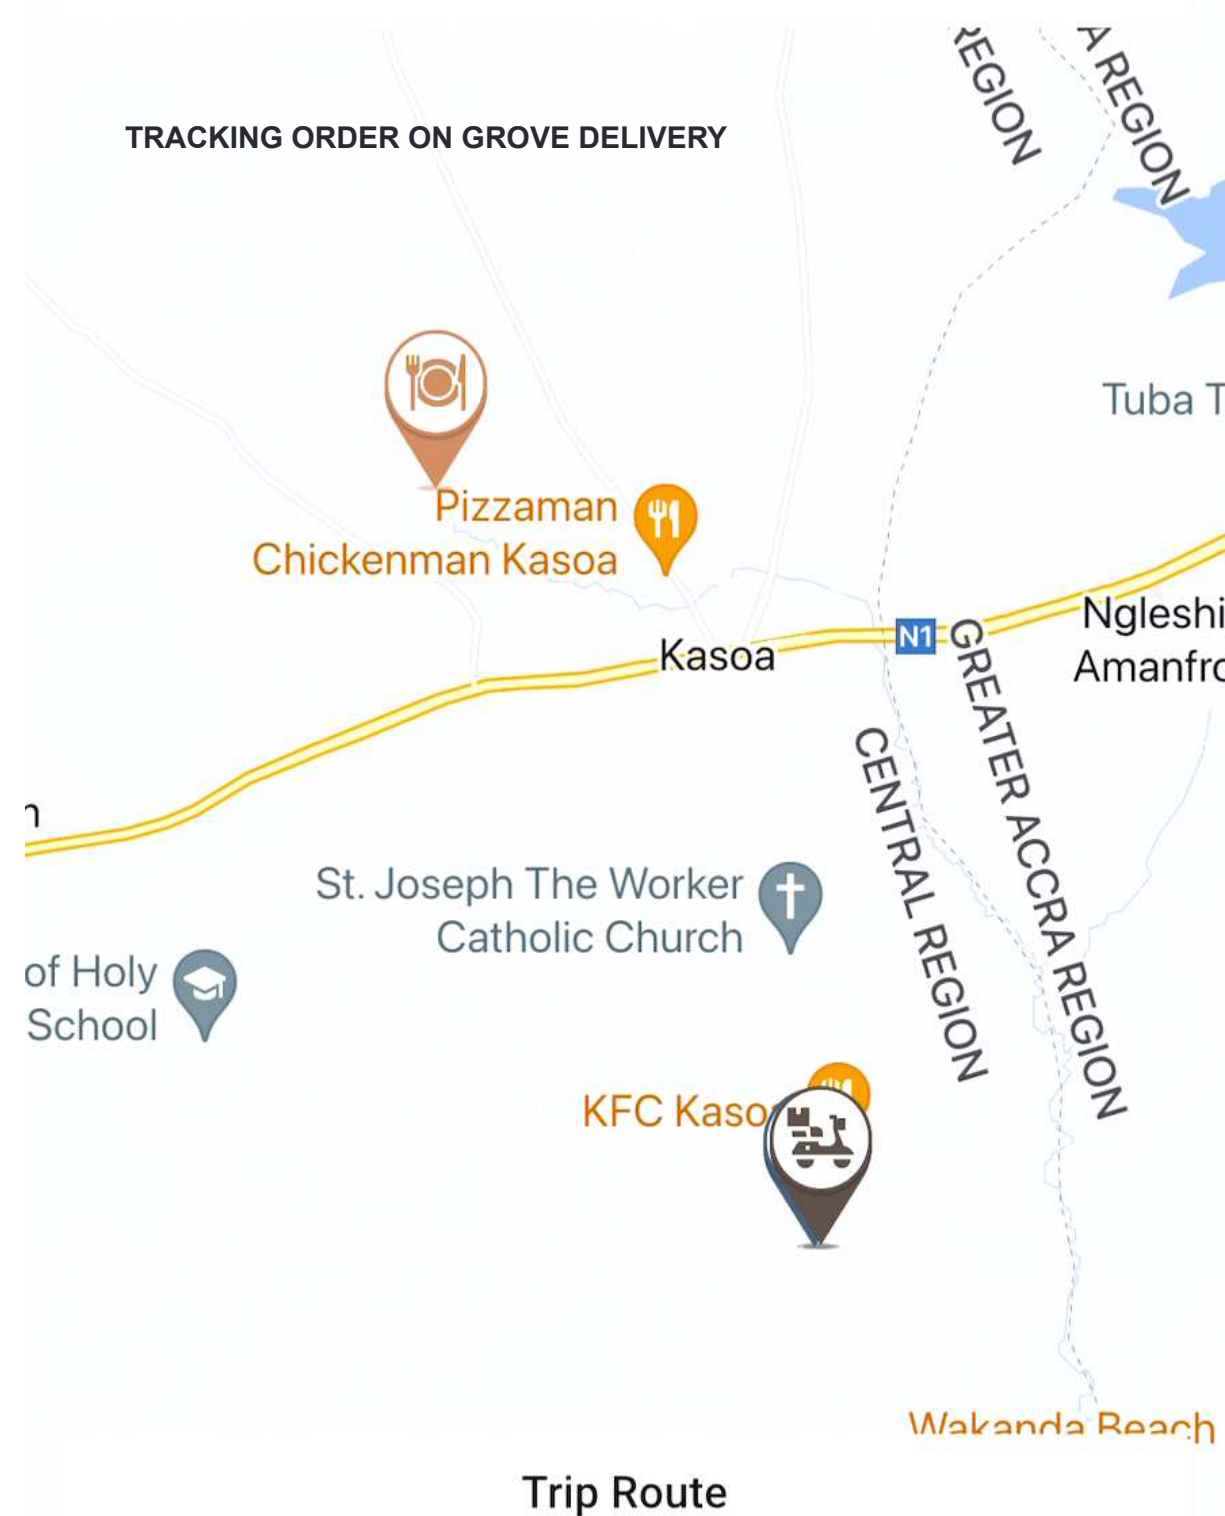

With our 24-hour customer support, your customers can request pickups and have their concerns resolved with our customer service team.

Concrete solution

Over the years delivery companies were not able to meet partner organizations' expectations, due to a lack of service delivery men or carriers. We, both our permanent and part-time delivery men, are working harder to complete customers' orders on time. With our live location feature on the app, your customers can track their parcels from the pickup station to the drop-off destination. This helps promote transparency in our operations

Exceeding expectations

We wish to grow your customer base and increase your product delivery counts to a higher expectation

Plan of action

To make our collaboration a great success, we propose the following action plan. Of course we will refine this further as soon as we get started. All your feedback is indispensable for a perfect result.

Phase	Information	Who	Duration
